PERSONAL STATEMENT

I develop web applications using some of the main frameworks: Javascript, React.js, and Typescript, as well as HTML and CSS, back-end experiences using node.js, and database using MySQL. During my internship, I automated spreadsheets and folders for the financial market, which had a positive impact on foreign companies that were consolidating in Brazil. Always concerned with the user experience, using concepts of User Experience - UX.

WORK EXPERIENCE

IT intern

At Integrance Finance and Consulting Services

September 2022 - January 2023

Provided technical support to users to solve general problems of all components of the company's corporate network, such as the development and implementation of computerized systems, involving the dimensioning of requirements and functionality, as well as the following functions:

- Updating, editing, and maintaining the site with WordPress and its plugins.
- Assistance and technical support to employees if they need it.
- Test and pass updates about our workspace to the team.
- Editing and manipulation of Google docs, Google Sheets, and Google Calendar using Apps Script.

Front End Developer

At Freelancer

February 2022 - present

Creation of projects based on practical experience in Full-stack development, guided by agile methodologies (Kanban/Scrum) and with the following technologies: HTML, CSS, JavaScript, React, Styled-Components, React Hooks, REST, Restful API, HTTP, Jest, Node.JS, Knex, TypeScript, MySQL, AWS, SQL, Git, Github, Firebase, Unit Testing, and UI Design.
